

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) An electronic apparatus comprising:
a first case including a wall which has a plurality of holes;
a second case coupled to the first case for forming a housing, and having a wall which has a plurality of holes; and
a speaker provided in the housing, the speaker facing to the holes of the first and second ~~case~~ cases; and
an elastic member supporting the speaker to the housing, the elastic member being located between the speaker and an inner surface of the first case, and between the speaker and the inner surface of the second case.
2. (Original) The electronic apparatus according to claim 1, wherein the speaker is arranged, straddling the first case and the second case.
3. (Currently Amended) The electronic apparatus according to claim 1, wherein the ~~sound~~ holes made in the first case differ in size from the ~~sound~~ holes made in the second case.
4. (Currently Amended) The electronic apparatus according to claim 3, wherein the first case is a lower case having a mount surface, the second case is an upper case covering the ~~first~~ lower case from above, and the ~~sound~~ holes made in the first case are larger than the ~~sound~~ holes made in the second case.
5. (Currently Amended) The electronic apparatus according to claim 1, wherein the speaker has a vibration member and a support member surrounding the vibration member, and ~~[[an]]~~ the elastic member fastens the support member to the housing.

6. (Currently Amended) An electronic apparatus comprising:
a housing having a first case and a second case, the first case having a wall which has a first ~~[[a]]~~ hole, and the second case having a wall which is coupled to the wall of the first case and has a second hole smaller than a diameter of the first hole; ~~[[and]]~~
a speaker provided in the housing and opposing the first hole and the second hole; and
an elastic member supporting the speaker to the housing, the elastic member being located between the speaker and an inner surface of the first case, and between the speaker and an inner surface of the second case.

7. - 8. (Cancelled).

9. (Currently Amended) The electronic apparatus according to claim ~~[[8]]~~ 6, wherein the first case has a support rib, the support rib cooperating with the first case for supporting the speaker.

10. (Original) The electronic apparatus according to claim 9, wherein the elastic member locates between the speaker and the rib.
